

CLEAN FOOD GRADE SYSTEMS WHILE RUNNING PRODUCTION

OVERVIEW

Meeting the specifications of FDA 21CFR 178.3570 for incidental food contact, DuraClean FG is a long life, preventative maintenance and light duty system cleaner, in addition to functioning as a long term heat transfer fluid. DuraClean FG is the perfect preventative maintenance tool for processors requiring a food grade system cleaner. It is capable of running in systems up to 550°F, is odorless and easily handles long term operation while seamlessly allowing production to continue uninterrupted for a complete oil cycle.

DURACLEAN FG IS THE FIRST AND ONLY FOOD GRADE, NO DOWNTIME SYSTEM CLEANER THAT UTILIZES THE LATEST IN ADDITIVE TECHNOLOGY.

DuraClean FG is the ideal system cleaner and perfect preventative maintenance tool. Capable of running in systems up to 550°F, it is odorless and easily handles long term operation while seamlessly allowing production to continue uninterrupted.

Compatible with most system fluids it will effectively dissolve and consume sludge and carbon build-up in minimal time but remains effective and can stay in the system for a full oil cycle. Simply fill a system and run production as usual.

Typical Properties	DuraClean FG
Maximum Use Temperature	550°F
Viscosity cSt @ 104°F	44.6cSt
Viscosity cSt @ 212°F	7.0cSt
Flash Point °F	465°F
Fire Point °F	497°F
Auto-Ignition Point °F	688°F
